

ion channel regulator activity
 ligand-gated monoatomic cation channel activity
 channel regulator activity
 potassium channel activity
 voltage-gated channel activity
 glycosyltransferase activity
 voltage-gated monoatomic ion channel activity
 ligand-gated monoatomic ion channel activity
 monoatomic ion-gated channel activity
 monoatomic ligand-gated channel activity
 metal ion transmembrane transporter activity
 hexosyltransferase activity
 inorganic molecular entity transmembrane transporter activity
 passive transmembrane transporter activity
 transmembrane transporter activity

● sulfotransferase activity

calcium ion binding
 structural constituent of chitin-based cuticle
 chitin binding
 structural constituent of cuticle
 structural constituent of chitin-based larval cuticle

number of genes

p.adjust
