serine hydrolase activity
structural constituent of chitin-based laserine endopeptidase activity
serine-type peptidase activity
structural constituent of chitin-based cuticle
structural constituent of cutin transcription factor activity

RNA polymerase II transcription factor activity DNA-binding transcription sequence-specific DNA DNA-binding transcription factor activity, RNA polymerase II-specific

extracellular matrix structural constituent

sulfotransferase activity ATPase–coupled monoatomic cation transmembrane transporter activity

inorganic molecular entity transmembrane transporter activity
monoatomic ion transmembraldor ketocreductaset (NADP) activity
transmembrane transporter activity inorganic cation transmembrane talcohol dehydrogenase (NADP+) activity
inorganic cation transmembrane transporter activity
active transmembrane transmembrane transporter activity
salt transmembrane transporter activity
salt transmembrane transporter activity
secondary active transmembrane transporter activity
symporter activity
symporter activity
chitin binding
