regulation of circadian sleep/wake cycle, sleep regulation of circadian sleep/wake cycle circadian sleep/wake cycle

regulation of anatomical structure size

cell surface receptor signaling pathway

morphogenesis of an epithelium
establishment of ommatidial planar polarity
post-embryonic development

instar larval or pupal development tissue morphogenesis
morphogenesis of embryonic respiratory system development
muscle contraction

embryonic development via the syncytial blastoderm locomotion

embryo development ending in birth or egg hatching cell migration muscle system process

tissue migration localization of cell

epithelium migration regulation of locomotion epithelial cell migration egulation of cell migration border follicle cell migration regulation of cell motility
